Radio Dalam, Kebayoran Baru, South Jakarta, Indonesia

Summary

Computer Engineering student at Universitas Indonesia (Class of 2027) with hands-on experience in AI-powered application development, fullstack engineering, and network infrastructure. Proficient in Python, JavaScript, and TensorFlow, with demonstrated projects integrating LLM APIs (Anthropic, OpenAI, Gemini). Seeking opportunities to apply technical skills in software engineering or AI engineering roles.

Education

Universitas Indonesia - Depok, Indonesia

Aug 2023 - Jun 2027 (Expected)

Bachelor's degree in computer engineering

- Relevant Coursework:** Artificial Intelligence, Human-Computer Interaction, Database System, Computer Networking, Cyber Security, Operating Systems, Object-Oriented Programming.

Skills

- Programming Languages:** Python, JavaScript, C, C++, Java, C#, Assembly (ASM)
- AI/ML & APIs:** TensorFlow, Keras, Anthropic API, OpenAI API, Google Gemini API
- Web & Backend:** React.js, Node.js, FastAPI, Django, REST API
- Databases:** PostgreSQL, MySQL, MariaDB, MongoDB, SQLite
- Networking:** Cisco Packet Tracer, Zabbix, OSPF, VLAN, VPN, Aruba APs
- DevOps & Tools:** Git, GitHub, Docker, Linux (Ubuntu), VirtualBox
- Security:** OWASP ZAP, dnSpy, Vulnerability Assessment, JWT Authentication
- Design & Productivity:** Figma, Postman, VS Code, IntelliJ IDEA

Technical Projects

- Wizlynn AI Assessment Platform (MVP)** | [GitHub](#) | *Individual Project*
 - Engineered a full-stack AI-powered assessment platform using **FastAPI** and **SQLite**, successfully automating enterprise onboarding workflows and **reducing manual evaluation time from 3 hours to under 2 minutes per assessment**.
 - Implemented an **Agentic AI workflow** integrating **Anthropic API** to perform multi-stage document processing, including intelligent knowledge point extraction, dynamic question generation, and automated scoring of open-ended assessments.
 - Developed a dual-view architecture featuring **human-in-the-loop validation**, achieving a **95% accuracy rate** in content generation while providing detailed AI-driven performance analytics and weakness analysis for users.
- BillyShopAI** | [GitHub](#) | *Individual Project*
 - Developed a scalable conversational AI interface using **Django** and **OpenAI API**, achieving a **sub-2-second latency** for real-time user-AI interaction responses.
 - Implemented **secure configuration management** utilizing python-dotenv and environment variables, ensuring **100% protection** of API credentials and adherence to industry security best practices.
 - Designed a dynamic frontend UI with **Django templates** and optimized backend routing, reducing API overhead by **20%** through efficient management of asynchronous request-response cycles.
- Deep Learning-Based Plant Disease Identification (CNN)** | [GitHub](#) | *Team Project*
 - Developed a high-precision image classification system using **TensorFlow/Keras** to detect tomato leaf diseases, achieving **92.24% validation accuracy** by leveraging **MobileNetV2 transfer learning**.
 - Engineered a robust model pipeline by implementing advanced **data augmentation** and **hyperparameter fine-tuning** to enhance feature extraction and effectively mitigate overfitting.
 - Conducted in-depth analysis using **Confusion Matrix, F1-Score, and Precision/Recall**, providing actionable insights into classification performance for visually similar disease classes.

- **SIK-GO (AI-Powered Website) | [GitHub](#) | Team Project**
 - Developed a comprehensive full-stack room-booking and document management platform using **React** and **Node.js**, successfully streamlining administrative workflows for **2+ university student organizations**.
 - Engineered an automated document analysis engine by integrating the **Google Gemini API** to perform intelligent proposal evaluation, plagiarism detection, and compliance validation for **100+ submitted documents**.
 - Implemented a secure system architecture featuring **JWT-based authentication** and robust file handling workflows to manage room reservation lifecycles for **200+ active users**.

Professional Experiences

Vplus Indonesia - Jakarta, Indonesia July 2026 – Oct 2026

Business Development Intern

- **Market & Equity Analysis:** Applied quantitative analysis on equity data using Excel, sector trends, and technical indicators to process price volatility and generate data-driven investment insights for client portfolios.
- **Client Advisory & Portfolio Consulting:** Consulted both personal accounts and senior manager's high-value clients, providing strategic guidance on US market positioning and asset allocation.
- **Client Acquisition & Financial Data Interpretation:** Translated complex market data into structured client reports and market updates, supporting advisory decisions for high-value portfolios and financial decision-making.

PT Charoen Pokphand Indonesia - Jakarta, Indonesia Jan 2026 – Feb 2026

Network and Infrastructure Intern

- **Network Monitoring & Data Analytics:** Monitored network health via Zabbix and processed RF logs (Top APs, Channel Utilization, Interference) using Excel to deliver technical optimization reports.
- **Infrastructure Management:** Maintained and optimized enterprise wireless networks using Aruba Access Points (AP) to ensure stable and secure connectivity across the site.
- **System & Database Configuration:** Deployed server environments using Ubuntu on VirtualBox and managed MariaDB database instances to support network monitoring workflows.

Leadership Experiences

Masa Adaptasi Dunia Kampus FTUI - Depok, Indonesia Aug 2026

Project Lead Department - Mentorship & Development

- **Team Leadership & Project Execution:** Led a 9-member team to design and deliver structured orientation assignments for over 300 incoming freshman students, ensuring operational targets and project timelines were met.
- **UI/UX & Assignment Design:** Directed the visual design and layout of student project materials on Figma, creating clear, accessible, and structured assignment templates distributed to 300+ freshmen.

Masa Adaptasi Dunia Kampus FTUI - Depok, Indonesia Aug 2025

Internal Committee Department - Mentorship & Development

- **Performance Supervision & Evaluation:** Supervised and evaluated 30 committee members and 300+ incoming freshmen within the department mentorship scope during a 3-day intensive program, conducting daily reviews to maintain strict operational compliance.
- **Quality Assurance & Process Optimization:** Designed comprehensive evaluation checklists and executed real-time monitoring to optimize session scheduling, freshman engagement, and material delivery standards.

Ikatan Mahasiswa Elektro FTUI - Depok, Indonesia Feb 2025 - Dec 2025

First Deputy of Public Service

- **Departmental Leadership & Outreach:** Managed a 12-member department, leading strategic planning for community outreach programs that engaged over 300 participants across JABODETABEK.
- **Strategic Program Coordination:** Spearheaded the execution of Elektro Charity as Steering Committee, coordinating multi-stakeholder initiatives across regional and student communities.

Certifications

- **Red Hat OpenStack Administration I: Core Operations for Domain Operators (CL110)** – Red Hat (Apr 2026)
- **Data Cleaning** – Kaggle (Feb 2026)
- **IBM Full Stack Software Developer Professional Certificate** – IBM (Feb 2026)
- **Ethical Hacker** – Cisco Networking Academy (Feb 2026)
- **CCNA: Introduction to Networks Course** – Cisco Networking Academy (Jan 2025)

Awards & Honors

- **Achievement Appreciation (Coral Reef Guardian)** – Recognized for outstanding contribution to community environmental program organized by BEM FTUI, involving 100+ participants. TekTukBum Vol.01, BEM FTUI (June 2026)
